Success with

OSGeo + Google Summer of Code

Become an Open Source Developer

Follow Standards
Make the code easy to deploy!

OSGeo Projects
Desktop Applications
Geospatial Libraries
Metadata Catalog
Web Mapping
Outreach
CMS

Document Code
Let others know what you are doing!

OSGeo-Live
Get to know the projects!

Listen to Mentors
It's the voice of experience!

Contact Project
Projects don't know you yet, so contact them!

Infrastructure
Install what you need for coding!

Make a Calendar
Deadlines are final! Time zones are different!

Research Skills
Be knowledgeable about your project!

Know the Project
Projects have webpages, documentation and mailing lists!

Weekly Report
Prepare and practice your weekly report!

Coding Language
Projects have their language of preference!

Be Patient
Projects do not make the final decisions!

Contribute
The GSoC program is all about contributing!

Application Review Listen to Community
Suggestions are on your behalf!
Make a good first impression!

Guidelines
OSGeo and GSoC have guidelines found on the OSGeo Wiki!

Guidelines
